

TESTBOY 114

Non-contact voltage tester from 12 V AC

From a voltage of 12 V, the non-contact voltage tester Testboy 114 detects a live conductor, amongst others, also in the low volt systems. Due to the capacitive measurement procedure, invisible brakes in the cables or a defective lamp in a chain of light can be accurately detected within a few seconds.

How you benefit:

- | capacitive measurement procedure
- | measurements from 12 V
- | LED torch
- | vibrating indication

Specifications

Technical Data	TESTBOY 114
Display	Optical + vibrating
Measurement Range	12-1000 V AC
Overload Category	CAT III 1000 V
Integrated LED-torch Lamp	yes
Standard	IEC/EN 61010-1 (DIN VDE 0411)
Housing	ABS synthetic material, resistant to breaking by impact
Dimension	160 x 25 mm
Weight	45 g
Colour	Red
Scope of Delivery	incl. batteries
