

## AR42 | Paint stirrer

To mix up our containers with the small 42 mm opening.

New paint stirrer to mix up our shielding paints in 1 and 5 liter containers. **None of the usual paint stirrers will fit in the 42 mm opening of our 1 liter containers.** That is why we have developed a stirrer by ourselves. **Made from soja-plastics** and printed on our industrial-3D-printers.

### Technical data

- **Size:** 42 mm x 60 mm
- **Bar length:** Stainless steel 33 cm
